

# THERMAL SPRAY COMPONENTS

## MP200 JAM Module - junction and monitoring thermal spray media

For each thermal spray process an individual JAM (Junction And Monitoring) Module is required. The modules are foreseen to connect the relevant spray guns. The JAM module measures the water temperature and the water flow, as well as relevant pressure of the connected gun. All the safety devices such as backfire valves are mounted inside the JAM Module. It also includes the HV ignition unit for the gun.
